

GCSE Statistics

To ensure that you achieve the highest grade possible you should be practising Statistics Exam questions outside of maths lessons.

You are set homework each week and should also be doing independent revision.

Maths 'Help Desk' runs after school on Thursdays in F7. Where you can work on Statistics as well as maths.

If you need help you can email me – vshaw@bba.bristol.sch.uk

You will need a scientific calculator and a geometry set in your Statistics exams. You must bring these to every lesson so that you know how to use them correctly.

You need a Casio FX-83GT or better and these are available from school for the discounted price of £6.50. We also sell geometry sets for £1.50.

The specification we are following is **Edexcel Statistics 1ST0**. We currently have revision guides for this specification available for sale at a price of £6.50 (includes exam questions).

GCSE Statistics is assessed solely on exams at the end of year 11.

There are two exams, you will need your scientific calculator for both.

Topics in Revision Guide

Section One — Planning Data Collection

Planning an Investigation.....	2
Types of Data.....	4
Simplifying Data.....	6
Grouping Data.....	7
Data Sources.....	9
Populations and Sampling.....	10
Random Sampling.....	12
Stratified Sampling.....	13
Systematic and Cluster Sampling.....	14
Quota, Opportunity and Judgement Sampling.....	15
Revision Summary for Section One.....	16

Section Two — Collecting Data

Questionnaires.....	17
Interviews.....	20
Observation and Reference Sources.....	21
Experiments.....	22
Experiments — Lab, Field and Natural.....	23
More on Experiments.....	24
Simulation.....	25
Problems with Collected Data.....	26
Revision Summary for Section Two.....	27

Section Three — Representing Data

Frequency Tables.....	28
Grouped Frequency Tables.....	29
Two-Way Tables.....	30
Interpreting Tables.....	31
Bar Charts.....	32
Stem and Leaf Diagrams.....	34
Population Pyramids and Choropleth Maps.....	35
Pie Charts.....	36
Comparative Pie Charts.....	37
Vertical Line Charts and Frequency Polygons.....	38
Cumulative Frequency Diagrams.....	39
Histograms.....	40
The Shape of a Distribution.....	42
Scatter Diagrams.....	43
Time Series Graphs.....	44
Choosing How to Represent Data.....	45
Misleading Diagrams.....	46
Revision Summary for Section Three.....	48

Section Four — Analysing and Interpreting Data

Mean, Median and Mode.....	49
Averages from Frequency Tables.....	52
Averages from Grouped Data.....	53
Measures of Spread.....	54
Measures of Spread — Grouped Data.....	56
Standard Deviation.....	57
Standard Deviation from Frequency Tables.....	58
Box Plots.....	59
Outliers.....	60
Skewness of Data.....	61
Comparing Data Sets.....	62
Standardised Scores.....	64
Summary Statistics — Index Numbers.....	65
Summary Statistics — Rates of Change.....	67
Estimating Population Characteristics.....	69
Estimating Population Sizes.....	70
Revision Summary for Section Four.....	71

Section Five — Analysing and Interpreting Diagrams

Scatter Diagrams — Correlation.....	72
Scatter Diagrams — Using Lines of Best Fit.....	73
Scatter Diagrams — Regression Lines.....	74
Spearman's Rank Correlation Coefficient.....	75
Interpreting Correlation Coefficients.....	76
Time Series.....	77
Revision Summary for Section Five.....	79

Section Six — Probability

Probability.....	80
Relative Frequency and Risk.....	82
Expected and Actual Frequencies.....	84
Sample Space Diagrams.....	85
Venn Diagrams and Two-Way Tables.....	86
The Addition Law.....	88
Independent Events.....	89
Tree Diagrams.....	90
Conditional Probability.....	91
Revision Summary for Section Six.....	93

Section Seven — Probability Distributions

The Binomial Distribution.....	94
The Normal Distribution.....	96
Quality Assurance.....	97
Revision Summary for Section Seven.....	98
